Setia SPICE Convention Centre, Penang

AUTOMEX PENANG 2026

3 -5 November 2026 | Setia SPICE Convention Centre, Penang

AUTOMEX Penang marks a new chapter for Malaysia's leading automation technology exhibition, expanding into Penang—one of the country's key hubs for electronics, semiconductors, precision engineering and advanced manufacturing.

The exhibition brings together technology providers, manufacturers, system integrators and industry professionals to discover the latest automation technologies, smart manufacturing solutions and Industry 4.0 innovations.

With live demonstrations, product showcases and networking opportunities, AUTOMEX Penang provides a platform to discover new technologies, build business connections and explore opportunities across Malaysia and the wider ASEAN market.

Focus Areas

- **Industrial Automation & Robotics**
- **Smart Manufacturing & Industry 4.0**
- **AI, IoT & Digitalisation**
- **Machine Vision & Inspection**
- **Motion Control, Sensors & Control Systems**
- **Manufacturing Equipment & Solutions**
- **Semiconductor & Electronics Manufacturing**
- **Precision Engineering & Advanced Manufacturing**

NOVEMBER 3 -5
Setia SPICE Convention Centre, Penang

Booth No. AD6-7

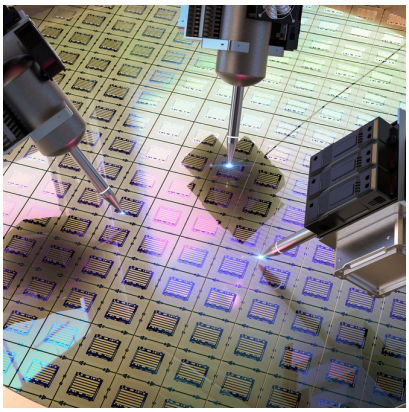

ASSOCIATION OF ELECTRONIC INDUSTRIES IN SINGAPORE

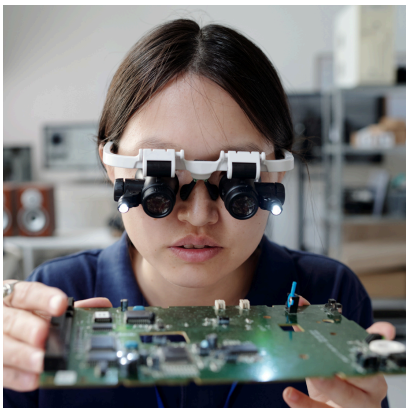

Established in 1973, the Association of Electronic Industries in Singapore (AEIS) is a leading industry association representing companies across Singapore's electronics and semiconductor ecosystem. With over five decades of industry experience, AEIS serves as a trusted platform for businesses to connect, collaborate and grow, while supporting the continued development and competitiveness of the electronics industry.

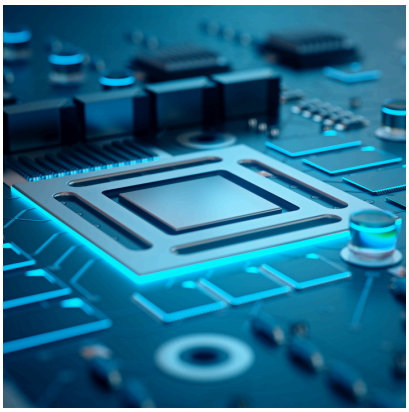

AEIS brings together companies across the electronics value chain and provides members with opportunities to build meaningful business connections, exchange industry knowledge and stay abreast of market trends and technological developments. Through industry networking, business matching, seminars, workshops, trade missions and capability-building initiatives, AEIS helps members strengthen their capabilities, explore new opportunities and develop strategic partnerships locally and internationally.

As the electronics industry continues to evolve, driven by semiconductors, advanced manufacturing, digitalisation, automation and artificial intelligence, AEIS remains committed to supporting its members in adapting to emerging trends and changing business needs. The Association actively promotes collaboration among industry players and stakeholders, creating platforms for knowledge sharing, business development and regional engagement.

With a strong network and established industry relationships built over more than 50 years, AEIS continues to champion the interests of its members and contribute to the growth of Singapore's electronics ecosystem.

ENTERPRISE SINGAPORE

Enterprise Singapore is the government agency championing enterprise development. It is a statutory board operating under the Ministry of Energy, Trade and Industry (METI) of the Singapore government.

With a global network in over 35 locations around the world, it drives Singapore companies' global expansion while connecting international businesses to trusted partners in Singapore.

Singapore is a powerhouse of growth. As a global hub for trade and innovation, it offers access to a thriving ecosystem of global enterprises, startups, and investors. Known for their commitment to quality and innovation, Singapore companies are also ideal partners for growth.

Enterprise Singapore is here for wherever businesses are growing.

ADA AI PTE. LTD.

Smarter Manufacturing Starts with Video You Can Act On

i-PRO, **Milestone**, and **ADA** combine intelligent cameras, open video management, and AI-powered analytics to help manufacturers gain clearer visibility into safety, security, and operations.

i-PRO cameras capture high-quality video across factory floors, warehouses, loading areas, and site perimeters. **Milestone XProtect** gives manufacturers a centralized view of video across sites, making it easier to monitor operations, review incidents, and stay aware of what matters most. **ADA's AI analytics** examine video for events that matter to safety, security and operations, helping teams focus their attention where it is needed.

Together, they support a range of manufacturing use cases:

- **Worker safety**: Monitor designated areas for potential falls, personal protective equipment (PPE) compliance, and other configured safety risks.
- **Restricted areas**: Detect activity near sensitive equipment and controlled zones to support site policies and procedures.
- **Site security**: Monitor entrances, perimeters, and loading areas for events that may require attention.
- **Incident review**: Quickly locate relevant video to understand events and support investigations.
- **Operational visibility**: Monitor activity across multiple areas and identify recurring issues or potential process bottlenecks.

Manufacturers can apply AI analytics to existing video infrastructure and configure detections based on the needs of each facility. By combining video, analytics, and centralized management, teams can gain greater visibility into daily operations, review incidents more efficiently, and make more informed decisions.

Visit us at Booth 4110 to see how i-PRO, Milestone, and ADA can help support safer workplaces, strengthen operational visibility, and enable faster response across manufacturing environments.

ALLIED DEVICES (S) PTE LTD

Allied Devices (S) Pte Ltd is a Singapore-based electronic components distributor and solutions provider serving customers across the Asia-Pacific region. Established in 1997, the company supplies a wide range of electronic components, including connectors, resistors, capacitors, switches, crystal oscillators, semiconductors and circuit protection components. It represents various international component manufacturers and supports electronics manufacturers through component sourcing, distribution and supply chain solutions.

Main product categories

- Electronic components and semiconductors
- Connectors and sockets
- Resistors and capacitors
- Switches
- Crystal oscillators and frequency components
- Circuit protection and surge protection components
- Acoustic components

D SQUARED
Regional Company . Local Support
Since 1990

Booth No. 4119

D SQUARED TECHNOLOGY PTE LTD

D SQUARED, founded in Singapore in 1990, is one of the leading regional system integrator for Auto ID & Data Capture (AIDC) systems & solutions in South East Asia.

Headquartered in Singapore; with 10 regional offices across Thailand, Malaysia, Indonesia, Philippines and Vietnam.

With factory trained and certified engineers, D SQUARED provides comprehensive pre-sales application, system implementation, training, on-site warranty and depot repair service to our valued customers.

ELCO INDUSTRIAL AUTOMATION (ASIA) PTE. LTD.

The global leader in industrial automation
ELCO Automation is a global leader in industrial automation, manufacturing over 60,000 high-quality components since 2003, with a presence on every continent.

Your ALL-IN-ONE solution provider for industrial automation
As your ALL-IN-ONE solution provider for industrial automation, we offer an extensive portfolio of top-tier products designed to meet the **highest standards** of the industry.

Product range
Our product range includes advanced sensors, cutting-edge vision systems, robust connectivity technologies, industrial networking solutions, controllers, motion solutions, machine lighting, and safety systems. Beyond our diverse hardware offerings, we are driving the future of smart industry with innovative digital solutions and custom software development.

INTERMECH

INTERMECH MACHINERY PTE LTD

Established in 1990, INTERMECH MACHINERY is an ISO 9001:2015 certified automation solution provider. We offer technical solutions and services to a wide range of industries with the objective to improve process efficiency and reduce costs. We believe that design is the basis of any project and our experienced engineers are trained to use the most updated designing software to meet international standards.

Experience & Expertise:
Established since 1990, our engineering teams have the most experience customize solutions for the customers.

Product and Services:
Awarded with ISO 9001:2015. For whichever area you choose to utilize us, you will find our professional engineering services to be an invaluable resource for your projects.

Value:
We make every effort to provide our customers with great products and services, and we work just as hard to make sure they are getting the right products and design that fits their needs.

NEPTRIX PTE. LTD.

Neptrix is a Smart Manufacturing Solutions provider established to support digital transformation for manufacturers.

A complete range of solutions is provided, including Manufacturing Execution Systems (MES), AIoT, machine connectivity, real-time production monitoring, predictive maintenance, digital twins and AI-driven analytics. Existing machines, systems and production processes can be connected to provide better visibility and support data-driven decision-making.

Solutions can be deployed on-premise or in the cloud and can be integrated with existing factory systems and equipment. This allows digitalisation to be carried out progressively without the need for major changes to existing infrastructure.
Neptrix solutions have been deployed across different manufacturing industries, supporting both local companies and multinational manufacturers.

Through practical implementation and manufacturing experience, higher productivity, improved OEE, reduced downtime and better operational visibility can be achieved while keeping digital transformation simple and manageable.
